(54) Title: ANTENNA MEANS

WO 01/26182 A1

(57) Abstract: The present invention relates to an antenna means for transmitting and/or receiving RF-signals in at least a first frequency band. The antenna means comprising a ground plane means (20) arranged to be connected to ground of a circuitry of a radio communication device, a conductive radiating structure (10) having a first end (12) and a second end (14), where said conductive radiating structure (10) being separated from the ground plane means (20). Said first end (12) being connected to ground and said second end (14) being a feed portion.
